Cobot in Damper Line Huejotzingo Plant

We pioneer motion

Problem Definition

What is the problem, where is the problem, what happen if the problem persist?

Currently the packaging process in Damper Line is making by an operator manually. This process is generating a cost by the operator. A Cobot could be the option to avoid this manual process.

What is the goal & what is the benefit?

Implement a Cobot to avoid the manual operation and the operator.

Project scope

Input: Damper Line / Packaging process

Output: Design Chance / Process / Packaging Desing

Student Profile

Mechatronics / Mechanics
